## Something Entirely New IN HOUSE DRESSES

### Famous DOUBLE-SERVICE Garments

We are now making a special display of these garments, and believe every one of our customers will be interested in seeing them. The many special features make these garments a big improvement over "old style" house dresses.

**No Buttons or Hooks and Eyes**

Two large snaps on the belt—as shown above—hold the entire garment in place. Under this arrangement the garment is adjusted to three different sizes.

**Easy To Put On**

Without a doubt the easiest and quickest to put on of any house dress made. On and off like a coat—no pulling over the head or stepping out of the skirt.

**Made "Princess" with Pocket and Two Reversible Fronts**

The "Princess" design gives the garment an exceptionally neat and tidy appearance. The pocket is a great convenience. The two reversible fronts give double service both as to wear and soil.

**Very Easy To Launder**

Another good feature is the ease with which this garment may be washed and ironed. The entire garment opens out flat with no buttons or "frills" to bother. An important point.

**This Garment May Be Used as a Dress, Kimono or Apron**

**A SPECIAL FEATURE**—Found only in the Double-Service Garments. To change the Waist Line on these garments raise or lower the belt, a trifle, a very simple operation. By moving the belt the garments may be made to fit perfectly, either short, medium or long waisted persons.

The Double-Service Dresses are adapted to several uses. AS A DRESS the garments are complete—really a 4 in 1 dress, comprising Skirt, Waist and 2 Aprons. Made with Low Collars and Square Necks. AS A KIMONO the garment has many special features not found in the ordinary kimono. AS AN APRON the Double-Service Garment gives perfect protection to any valuable clothing worn underneath it. The Double-Service Garment is a Complete Dress (it is not an apron) but it has the additional advantage that it may be used like a big apron for protection.

Double-Service Garments are made on a Quality Basis—the best of materials and workmanship entering into their manufacture.

These New Style House Dresses are cheaper—in the end—than old style wrappers. Every woman is interested in the New Ideas in wearing apparel, therefore: Be sure and see these Garments while we have a good assortment of patterns. Prices \$1.49, \$1.98 and \$2.15.

## FLORAL HORSESHOE FOR SUPT. BOGUE

Presented by Employees at Gas and Electric Works on 45th Birthday—Friends Call in Evening.

Tuesday was the 45th birthday anniversary of William F. Bogue, superintendent of the gas and electric department of the city. He was greatly surprised when he reached home at supper time to find a large floral horseshoe containing forty carnations and forty roses, a testimonial from the employees of the gas and electrical works.

## KELSON IN PORTO RICO

Negro Wanted for Bad Assault in New London is Located.

By way of friendly channels, the whereabouts of Sam Kelson, a fugitive for nearly two years, has been determined. Sam, who is a negro, now lives in Ponce, Porto Rico. He was wanted for assaulting with intent to kill Samuel H. Bogue, U. S. Olympian, on June 23, 1909, at New London. Bogue, when heard from last, was in the west. The expense of getting Kelson back from Porto Rico and bringing him here to testify against him would probably be more than the conviction of Kelson would be considered to be worth.

There are many in the New London department who are reasonably certain that if they went to New Orleans they could find James B. Lot, another negro charged with assault. Lot's bondsmen came with him about the time that Kelson was here to testify against him. He is under bond to appear in the superior court. The last place he left it was understood that he was bound for New Orleans. It is generally considered that the room he would take up is worth more than his company, as is the case with Kelson. As long as Kelson stays in Porto Rico he will probably never be molested. If he comes back to the United States it is probable that the police will know about him.

Kelson was very badly wanted two years ago. He was traced to Bridgeport and behind a window blind there told a friend later that he heard a New London officer inquiring for him, only a few feet away. Kelson, and that's why they wanted him so badly.

## MONTVILLE ROADS

Special Meeting to Act on Proposed Changes.

First Selectman Moses Chapman has issued notices calling for a special town meeting to be held at the town hall, Eastmont, on Tuesday, May 2, at 2 p. m. Another matter which will be brought up at the meeting is a proposal of the selectmen to do away with a short section of highway near the Bank mill of the C. M. Robertson company and substitute another section which will eliminate many curves. The section in question is between the Bank mill and Rockland mill and is about fifty rods in extent. It starts at the top of the hill near Bank mill and ends on the Norwalk road and is bounded on one side by the land of the Ames Rogers heirs and on the other by land of John Adams and wife.

## LOST A WHEEL

Large Team Loaded with Wool Was Minus A Nut.

One of Hall Brothers' heavy teams, driven by Trumbull Whitmarsh, and loaded with wool in bales, lost a front wheel Tuesday afternoon when the driver attempted to swing him team out of the car tracks, in front of the Steiner building. The axle slipped to the ground and dragged along a few feet on the vitrified brick pavement before the team came to a stop.

When driver Whitmarsh got down to investigate in looking for the nut that was gone off the end of the axle and he started a search back along the route he had come from Hall Brothers' wharf. The lost nut was found right at the wharf, showing that the wheel had run all right without any nut as long as he kept the team straight, but the car track pulled it off.

When the wagon had been jacked up, the wheel and nut were put back and the trip to Hallville resumed.

## HOW TO GET FAT

Use Samosa, Says Druggists N. D. Sevin & Son, and Put on Good Flesh.

The almost universal interest in physical culture is the best evidence that can be offered as to the need of making thin people fat, increasing strength and restoring health.

Athletic, when carried to an extreme, often results in straining the vital organs. How much better it would be for the average person to regain health, strength and flesh by using Samosa. This flesh forming food is assimilated as soon as it enters the stomach; it helps the organs to assimilate the food and extract the flesh forming elements; it builds up the muscles and rounds out the limbs into shapely plumpness.
